X @leonjza

convince you

```
log_write(  
    LOG_STDOUT | LOG_SKID,  
    "Happy %d%s Birthday ..., may it live to be %d!\n",  
    local_time.tm_year - 97,  
    (  
        a>=11&&a<=13?"th":(  
            a%10==1?"st":(  
                a%10==2?"nd":(  
                    a%10==3?"rd":"th"  
                )  
            )  
        )  
    ),  
    local_time.tm_year + 3  
);
```

```
#ifdef GAPIING_SECURITY_HOLE
char * pr00gie = NULL;

void doexec (fd) int fd;
{
    register char * p;

    dup2 (fd, 0);
    close (fd);
    dup2 (0, 1);
    dup2 (0, 2)
    p = strrchr (pr00gie, '/');
    if (p)
        p++;
    else
        p = pr00gie;
    execl (pr00gie, p, NULL);
    bail ("exec %s failed", pr00gie);
}
#endif /* GAPIING_SECURITY_HOLE */
```

less people seem to know
how stuff *really* works.

what do you mean by a
contribution?

“infosec free-riders”

**free-rider
cycle**

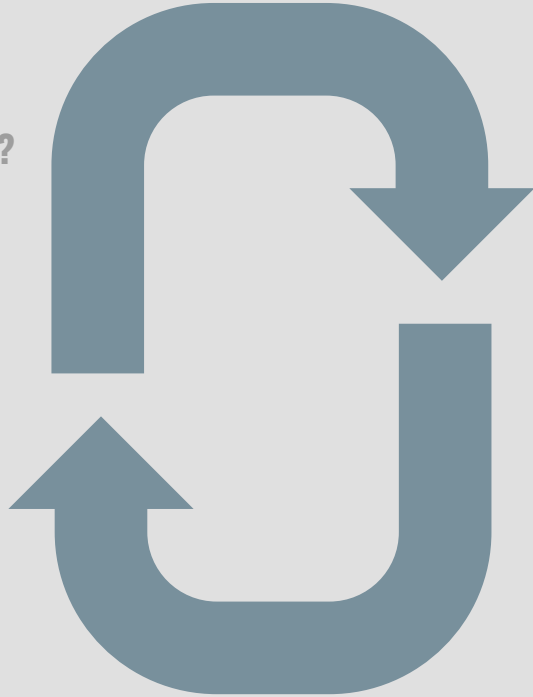

self-interest, closed/private groups.

JAILBREAK ETA WEN!?!?

ohai

collective action, public good.

**research is not made public
anymore**

why: contribute?

how: do i start?

what: do i contribute?

what: is the goal?

how: do i get there?

why: should i (anyone) care?

the what

what is the goal?

often, the goal isn't clear.

the how

how do I get there?

“this has already been done”

**“i can’t possibly add something
here”**

the why

why should i (anyone) care?

on **success** and **failure.**

~~“infosec free-riders”~~

make that
contribution, today

Thank You
